It is commonly known fact that sintered brake pads have much longer life than organic materials brake pads. Sintered brake pads consist of baking plate with galvanized surface finish and braking compound with main proportion of copper additives.

GOLDfren brake pads are made in Europe, their quality is very high and their price is very good. GOLDfren brake pads are used as spare parts for the best MTB brands worldwide. They can be used for both racing and everyday use. They are the best choice.

We can also supply springs and pins on demand.

GOLDfren MTB brake pads have been manufactured since 2003 and selecting the right compound for your needs is very important.

GOLDfren offers two sintered compounds: AD and DS. Both are economical and suited for all brake discs.
